

THE PLATFORM — INTERNAL DOCUMENT

Business Development Plan

Company identity, organizational structure, creator welfare framework, revenue model, and competitive strategy.

01 — COMPANY IDENTITY

Who We Are & Why We Exist

Queer adults living outside the mainstream deserve a platform that doesn't apologize for who they are. We exist to give the PNP community a space where creators build real income, members find real connection, and nobody has to hide.

Mission

We run the safest, most creator-first adult platform for queer communities — where welfare, autonomy, and dignity are non-negotiable operating principles, not marketing copy.

Vision

The global reference point for ethical, community-driven adult content — where the industry looks to us when they want to know what responsible creator economy looks like.

North Star Metric

ACTIVE CREATOR EARNINGS

Total monthly income generated by creators on the platform. When creators earn more, everything follows: better content, more members, more trust.

Values

Radical Honesty

We tell creators our commission. We publish our safety stats. We don't hide behind policies.

Built From Your Feedback

Every feature exists because a creator asked for it. We don't build what we think you need — we listen, then build. The platform is yours to shape.

Protect First

Any decision that trades user safety for revenue gets vetoed. Every time, without exception.

Creator-Led

Major product decisions go through a creator advisory panel before shipping.

No Performance

No corporate theater. No unnecessary meetings. No performative values.

Community First

Business decisions serve the community, not the reverse.

02 — ORGANIZATIONAL STRUCTURE

10-Person Company — Phase 2

Department Mandates

Dept	Core Mandate	Owns
Technology	Platform online, fast, secure. Ship on time.	Architecture, deploys, infra
Creator Welfare	Every active creator is here by free, informed choice. Confirm at intake; protect ongoing.	ATS, training, check-ins, distress protocol
Marketing	Grow member base and creator roster without compromising brand or community values.	Zoho Campaigns, social, referrals
Ops & Finance	Taxes filed, creators paid on time, 2257 current, contracts signed.	Zoho Books, 2257 calendar, contracts
Customer Exp.	Human responses within 24h for all escalations.	Support escalations, member relations

Hiring Timeline

#	Role	Department	Month	Est. Monthly Cost
1	Operations Manager	Ops & Finance	Month 1	\$1,200–2,000
2	Creator Success Manager	Creator Welfare	Month 2	\$1,000–1,800
3	Welfare & Safety Officer	Creator Welfare	Month 3	\$1,200–2,000
4	Content / Community Mgr	Marketing	Month 4	\$800–1,500
5	Growth Marketer	Marketing	Month 5	\$1,200–2,000
6	DevOps / SRE	Technology	Month 6	\$1,500–2,500
7	CX Lead	Customer Experience	Month 7	\$800–1,400

* Latin America-based remote hires. Each hire gated on MRR covering cost with 3 months runway margin.

03 — CREATOR WELFARE & ATS

Welfare-First Creator Intake Pipeline

CORE PRINCIPLE

This is NOT a talent acquisition funnel. It is a welfare-first intake process that happens to result in creator onboarding. Every stage is designed to detect coercion, financial desperation without alternatives, isolation, and third-party control. **Tool:** Zoho Recruit (included in Zoho One).

01 Discovery

Track source: organic, referral (which creator?), social, Telegram. Referral by a known creator = highest quality signal. Referral by an unknown "agent" = red flag.

02 Expression of Interest

Lightweight form: age, location, content type, Telegram handle. Hard gate: must be 18+. No photos or content required yet.

03 Full Application

Legal name, ID document, social presence (identity only), why they want to create, what content they plan to make, whether anyone helped them apply (red flag if yes and can't name who), emergency contact.

04 Document Verification

2257-compliant ID verified. Age confirmed. Identity cross-referenced. Zoho Sign: 2257 acknowledgment signed electronically. Disqualify: fake ID, under 18, name mismatch without explanation.

05 Welfare Interview — Most Important Stage

30-min video call. Conversational, NOT interrogative. Tone: "we want to get to know you." Assesses: voluntary participation, financial context (desperation vs opportunity?), support network, substance use (non-judgmental — PNP-specific), understanding of content permanence, third-party involvement. Hard disqualifiers: signs of third-party control, capacity-impairing dependence, uninformed about permanence after explanation.

06 30-Day Trial Onboarding

Full platform access. Weekly check-in from Creator Success Manager. Week 2: content review (welfare focus — is content consistent with stated intent?). Week 4: trial review call — move to Active, extend trial, or dignified exit.

07 Active Creator

Full status. Monthly welfare check-in. Quarterly earnings review. Annual 2257 renewal reminder via n8n automation.

08 Distress Flag Protocol

Triggers: 14+ days silent, 80%+ earnings drop, member abuse report, distress message. Creator Success Manager reaches out personally. Welfare Officer looped in. Options: extended break, harm reduction referral, full exit.

09 Offboarding

Voluntary: content pause explained, deletion process clarified, exit interview offered. Involuntary: reason in writing, appeal process available, 30-day archive before deletion.

04 — REVENUE MODEL

Revenue Streams

Stream	Description	Commission
PRIME Subscriptions	Monthly platform membership — primary revenue driver	100% platform
Channel Subscriptions	30-day passes to paid creator channels	30% / 70% creator
Private Calls	Booking fee + session commission	30% / 70% creator
Ru\$h Tokens	Tips during live streams and hangouts	30% / 70% creator
Ticketed Shows	One-time paid events on Main Stage	Month 8
Training Certification	Non-creators pay for Creator Academy access	Month 8
Profile Boosts	Pay Ru\$h tokens for 24hr discovery boost (CPM)	Month 8
B2B Licensing	License welfare-first ATS to other platforms	Year 2–3

05 — MARKET POSITIONING

Competitive Moat & Positioning

We are NOT: a generalist adult platform (OnlyFans, Fansly) · a hookup app (Grindr, Scruff) · a generic porn site.

We ARE: The only adult platform built explicitly for the PNP-adjacent queer community, with harm reduction and creator welfare as non-negotiable operating principles.

Competitive Moat

Moat	Why It's Defensible
Community Specificity	PNP + queer niche = deep loyalty, low substitution. Members cannot find this anywhere else.
Creator Welfare Brand	A creator who feels protected stays and advocates. Impossible for a VC-backed competitor to fake.
Safety Credibility	Harm reduction baked in becomes a legal and reputational shield, not just a marketing point.
Technical Reliability	When the architecture roadmap ships: better uptime and tools than any comparable platform.
Community Trust	Santino's personal brand and community relationships are not replicable by any outside investor.

Unit Economics to Track

Metric	Definition	Target
ARPU	Total revenue / active members	Growing month over month
LTV	ARPU × avg subscription months	LTV > 3× CAC
CAC	Total marketing spend / new paying members	Minimize over time
Creator Take Rate	Total creator earnings / total gross revenue	≥ 60%
Churn Rate	% PRIME members who don't renew each month	< 10%

90-Day OKRs

Area	Key Result
Company	Zoho One fully operational (CRM + Books + Campaigns) by day 30
Technology	BullMQ live, zero silent failures for 30 consecutive days
Creator Welfare	Creator welfare ATS live, all new applications processed through it
Finance	First P&L report generated in Zoho Analytics by day 30
Marketing	First re-engagement campaign to churned PRIME subscribers sent by day 30
