THE OPPORTUNITY

Every media company needs a creator platform. Most can't build one.

\$2M+ Build Cost

A comparable platform (live streaming + VOD + communities + crypto payments + AI moderation) costs 18–36 months and \$1.5–2.5M to build from scratch.

Speed to Market

Agencies lose creators to competitors while waiting for custom builds. Creator Studio deploys a fully branded platform in 7–14 days with zero engineering overhead.

Maintenance Burden

Even agencies that build their own platform spend 40% of engineering capacity on security patches, payment compliance, and infrastructure — not features.

Payment Complexity

Integrating Stripe + crypto + regional payment methods for adult/queer content is

LATAM Underserved

No white-label creator platform has Spanish-language-first UX, LATAM crypto payment

2257 Compliance

Adult content platforms require 18 USC §2257 record-keeping. Most white-label

THE PRODUCT

PNPtv! Creator Studio: Your platform. Our infrastructure.

Creator Studio is a white-label licensing layer on top of PNPtv!'s production infrastructure. Clients get a fully branded creator economy platform — custom domain, logo, color scheme, pricing — while we handle everything else.

What clients bring:

- Their brand (logo, colors, domain)
- Their creator roster
- Their community / audience
- Their content strategy

What we provide:

- Complete full-stack platform (hosting + infra)
- All payment integrations (crypto + fiat)
- Live streaming, VOD, communities, DMs

INCLUDED MODULES

Analytics Dashboard

TARGET CUSTOMERS

Who buys Creator Studio

Talent Agencies

Agencies managing 10–100 adult content creators who currently rely on OnlyFans and lose 20% platform fee + algorithm control. Studio gives them a branded platform with direct billing and full creator analytics.

ICP: LATAM adult talent agencies

~200 agencies in MX, COL, ARG managing 5-50 creators each

LGBTQ+ Media Companies

Gay/queer media brands that want to launch a dedicated creator platform for their audience — with privacy controls and crypto payment rails that mainstream platforms don't offer.

ICP: LGBTQ media / events organizers

Pride festivals, gay bars, queer podcasts — launching fan clubs

Independent Creator Networks

Collectives of adult or alternative creators who want to co-own their platform rather than paying a third-party cut. Split subscription revenue

Harm Reduction Organizations

NGOs and health organizations serving drug-using or sex worker communities that need a private, censorship-resistant community platform

PRICING

Simple, transparent licensing.

REVENUE MODEL

**Recurring SaaS + GMV share.
High margin. Low churn.**

Creator Studio has two locked-in revenue streams per client: a fixed monthly license fee (high margin, predictable ARR) and a GMV percentage that scales linearly with client success.

WHY NOW

Three tailwinds converge in 2026.

OnlyFans Backlash

After 2021's failed adult content ban, thousands of creators moved off OnlyFans. Many still want an alternative — and agencies are actively shopping for white-label replacements that don't hold creator data hostage.

LATAM Digital Boom

Latin America added 55M new internet users in 2023–2025. The region's creator economy is growing 3× faster than the global average, but no white-label platform serves it in Spanish with LATAM payment rails.

Crypto Normalization

Bitcoin ETF approval (2024) and stablecoin legislation (2025) made crypto payments mainstream. Adult and queer content creators — long excluded from card payments — now have a frictionless path to monetization.

Why We Can Execute

- PNpTv! is already live — not a prototype
- Full-stack monorepo built for multi-tenancy from day 1
- 3 payment gateways already integrated and production-tested
- 2257 compliance system already deployed

What Investment Unlocks

- Multi-tenant infrastructure (isolated DB per client)
- Self-service admin panel for client onboarding
- Stripe integration for clients who need card payments
- Branded iOS/Android app builds per client

THE ASK

Seed Round: \$200,000

dedicated to Creator Studio buildout

45%

Multi-Tenant Engineering

Isolated database provisioning, client admin panel, self-service onboarding flow, and branded app build pipeline.

35%

Sales & Partnerships

Agency outreach in MX/COL/ARG, first 5 pilot client subsidies, legal DPA templates, and conference presence.

20%

Infrastructure & Legal

Dedicated server provisioning, compliance attorney review, data processing agreements, and 12-month runway buffer.

"Creator Studio is the B2B layer that turns PNPTv!'s hard-won payment integrations, 2257 compliance, and AI infrastructure into a recurring SaaS business — without us having to acquire every creator directly."
